About us

ALBROMET
join us in metals
#albrometalle

Founded in 1994, we are now one of the leading suppliers of aluminum bronzes and high-strength copper alloys - whether as semi-finished products or finished parts manufactured according to customer-specific drawings.

We are also manufacturers of tube bending tools for a wide range of tubes and tube materials. Depending on the intended use and tube material, these are made from aluminum bronze, tool steel or technical plastic. More than 30 years of expertise guarantee competent advice and service.

All Albrometals are REACH and RoHS compliant.
The company is certified under ISO 9001 since 1998 - currently according to ISO 9001:2015.What motivates us? To keep getting better! And to exceed your expectations. Give us a try!

Our management team: Andrea Bäring & Stefan Hübner

Our vision is to help shape the technologies of tomorrow with sustainable, high-performance copper alloys and a spirit of partnership - customer-focused, responsible, and always one step ahead.

Key figures

Sales in TEUR	8.000
Employees	29

Aluminum bronzes

We stock aluminum bronze in a wide range of grades and formats, including cast or forged plates, rings in all sizes, and tubes or round bars as wrought alloys or in continuous casting. See for yourself our extensive product range and fast delivery times.

Best sliding friction properties:

- Hard and corrosion - resistant
- Low adhesive tendency
- Excellent machinability
- Certified for food industry

Aluminum bronze product range:

Our food certifications:

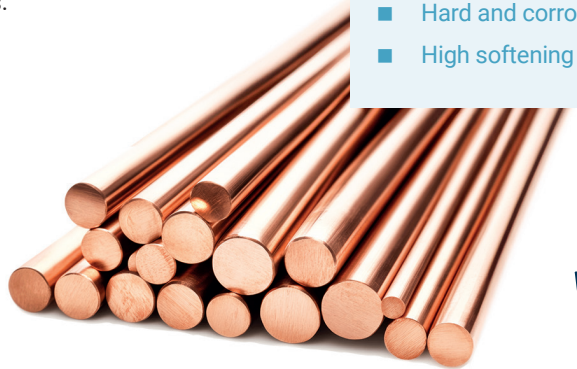

Low-alloy copper

ALBROMET offers a wide range of highly conductive copper alloys. Alloy components such as nickel, cobalt, silicon, beryllium, and chromium give these alloys unique combinations of properties that are highly valuable in many application areas.

Highest conductivity and hardness:

- Very high electrical and thermal conductivity
- Non-magnetic/non-magnetizable
- Hard and corrosion-resistant
- High softening temperature

Low-alloy copper product range:

Also beryllium-free

Finished parts

Thanks to our own machine park and strong partners, we manufacture components from aluminum bronzes and high-strength copper alloys – precisely and cost-efficient.

Your advantages:

- Relieve production facilites by manufacturing individual or series parts
- Optimal surface finish
- Specialized machinery for non-ferrous metals
- Experienced workers in mechanical processing

Tube bending tools

ALBROMET tube bending tools are ideally adapted to the corresponding bending task. Whether bending mandrels, wiper dies or bending dies made of aluminum bronze, tool steel or high performance plastic, all tools are produced in-house.
The focus is on durability and minimal wear.

The advantages of our tube bending tools:

- Continuously high bending quality
- All bending tools from a single source
- Expert advice
- Long service life
- Changeable spare part-kits, available from stock

Our Promise

ALBROMET – Your partner for customized solutions

We offer individual advice, tailor-made designs, and prompt execution – tailored to your specific needs.

“Thanks to the materials consultation, we found exactly the right material for our project—perfectly suited and efficient.”

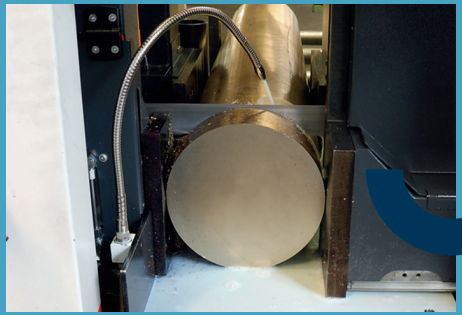

„Even with complicated challenges, we were able to count on ALBROMET’s technical advice.“

„The sawing service was excellent—we received our semi-finished-products in exactly the size we needed.“

„Thanks to our cooperation as contract partners, our supply chains are stable and our warehouse is significantly less burdened.“

„We value that ALBROMET-materials comply with REACH and RoHS regulations, which means we are also safe in terms of regulatory purpose.“

It´s Our Responsibility

Living up to our responsibilities has been an integral part of our corporate culture for more than 30 years. It creates trust and forms the basis for our sustainable success.

We understand sustainability as a balanced interaction of ecological, social and economic aspects. Quality management, occupational health and safety, environmental protection, and our compliance management play a central role in this.

Our Code of Conduct sets clear, enforceable standards for fair and correct behavior within the organization. Supported by our management and for the benefit of our employees, our company, and our partners.
